

Downhole Instrumentation Installation Equipment

RIG AIR OPERATED BACK PRESSURE SPOOLER

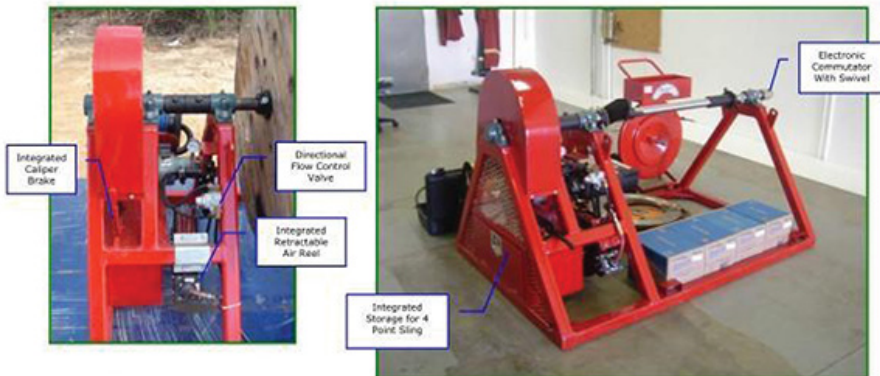

- Directional Control Valve
- Integrated Lift Points
- Integrated Air Pressure (Cable Tension) Regulator, Drip Oiler, Water Trap
- Integrated 25' retractable air line (aux output for air tools or air gun)
- Integrated 50' air line for connection to rig air supply Integrated draw-works calliper brake
- Integrated storage compartment (for included 4 point lifting sling)
- Included continuous data collection ring (electrical commutator) for logging signal while deploying system in well bore
- Quick release arbor shaft, self adjusting drive arms and quick release follower nut
- Designed to accommodate spools from 24-60" diameter and overall width from 15-36"
- 2.5" Solid Parkerized Steel axle C/W heavy duty Babbitt Bearings

Continuous Data Acquisition. 4 x 4 All Terrain Truck.

PRODUCT SUMMARY

- With over 20+ years of continuous pressure monitoring experience, GEO PSI can put together customized installation equipment packages suitable for deployment in any environment.
- Products can be certified.

PROFESSIONAL TOOL PACKAGE

- GEO PSI offers a full line of professional installation tools proven to withstand the harsh environment of the rig floor. Some of these tools are specialty tools which have been designed in house by experienced field engineers. The tools are shipped in a heavy duty steel tool box which make it easy for the customer to transport to site. Practicality, Knowledge & Good Quality Equipment is the recipe for successful results. Geo Psi is constantly looking for ways to reduce input costs so that we can pass our savings on to the customer.
- Some of the main tools that are included in the equipment package are a Back Pressure Spooling Unit, Pneumatic Strapping Tool, Hydraulic Clamping Tool, Heavy Duty Banding Cart with integrated Brake and a variety of specialized hand tools. Our professional tool package includes all of the tools necessary to complete a standard tubing deployed system.
